

# ChassisCare<sup>®</sup> for Trucking

## About ChassisCare<sup>®</sup>

On-board chassis lubrication was practically invented by Joseph Bijur for 1924 Packard cars.

ChassisCare<sup>®</sup> On-board Lubrication Systems from Bijur Delimon International replace your routine A Schedule preventive maintenance with a refill and inspection check during your B Schedule service.

## Benefits of ChassisCare<sup>®</sup>

- Lubricates on-the-go, providing small amounts of grease on a regular basis
- Proven to reduce wear and extend life of king pins, spring pins, steering links, and brake components
- Less time in the shop for repairs = more time on the road
- Pre-configured kits make installation easy
- Reduces lubricating time and saves money.
- No missed lubrication points
- Use your preferred grease

# ChassisCare® Automatic Lubrication for Trucking

## Lubrication Points for Tractors

## Lubrication Points for Trailers

- Lubrication "on-the-go" provides improved distribution of grease within the lubrication points, reducing wear, and extending equipment life.
- Automatic lubrication provides a safer environment for your operators and technicians because there is no need to crawl over and under the equipment to service hard-to-reach lubrication points.
- The BL3 Lubricator is available in 12 or 24 VDC motor and a 3 liter reservoir, used in conjunction with VXLO indirect injectors mounted throughout the distribution network.

## Manual SureShot Kits for Trucking

SureShot Manual Lubrication Kits from Bijur Delimon International are an economical way to rev up your service program.

- Manually lubricate your tractor or trailer while standing up
- Use standard NLGI #2 chassis grease
- Service several points from a single grease fitting
- Chassis, steering, and brake components last longer
- Quick and Easy to install
- Kits include fittings and pre-filled tubing
- Kits available for 3 to 12 points
- Easily upgraded to a fully automatic system
