

## The Lubrication Solution for Fire Apparatus

### KEEP YOUR APPARATUS ON THE ROAD, NOT IN THE SHOP.

- A Bijur Delimon system greases every point while your apparatus is in operation and maintains a constant barrier at bushings preventing dirt and debris from entering wear surfaces.
- Increased safety as there is no need to crawl under or over equipment to service hard-to-reach lubrication points.
- Avoid costly repairs and downtime.
- Post lubrication technology delivers grease when the lube point is ready to accept it.

*Adding a Bijur Delimon lubrication system increases equipment life by decreasing wear on vital components. Automatic lubrication systems safely and continuously supply lubricant while your machine is running.*

# PROVEN QUALITY, RELIABILITY AND ACCURACY.

## Fluid Grease System

- =Economic system that allows you to easily lubricate “on-the-go.” Lubricant is only discharged while your apparatus is in motion, keeping it off your fire house floor.
- Electric (12/24 VDC) BL3 Lubricator suitable for fluid chassis grease NLGI class 00, 000
- Quickly adjust delivery volumes by simply changing the injector meter cap.
- Lower operating pressures allow for easy installation with nylon tubing and push-to-connect fittings.
- The BL3 Lubricator is a compact unit allowing it to easily be located under the vehicle.
- System continues to work if a lubrication point is blocked.
- Dramatically reduce unexpected failure or critical mechanical components on the chassis.
- The BL3 Lubricator is specifically designed for the emergency vehicle environment.
- Tubing is color coded for easy tracing of line.
