

SureShot Lubrication Kit for Trailers

STATE OF THE ART MANUAL LUBRICATION SYSTEMS

- Proven to reduce wear and extend life of "S"-cams and slack adjusters.
- Less time in the shop for repairs = more time on the road.
- Pre-configured kits make installation easy.
- Reduces lubricating time and saves money.
- No missed lubrication points.
- Use your preferred grease.

Adding a Bijur Delimon lubrication system increases equipment life by decreasing wear on vital components.

PROVEN QUALITY, RELIABILITY AND ACCURACY.

Manual SureShot Kits for Trailers

For trailers with multiple lubrication points, you sometimes need a method to grease them from a centralized location with a grease gun.

The SureShot system delivers a positive measured shot of grease to each of the connected lubrication points through a single manually-fed grease fitting. Just mount the block in a convenient location and route the pre-filled tubing to each lubrication point. Then, walk up to the block and grease your entire trailer.

- Manually lubricate your trailer while standing up.
- Use standard NLGI #2 chassis grease.
- Service several points from a single grease fitting.
- Quick and Easy to install.
- Kits include fittings and pre-filled tubing.
- Kits available for 3 to 12 points.
- Easily upgraded to a fully automatic system.

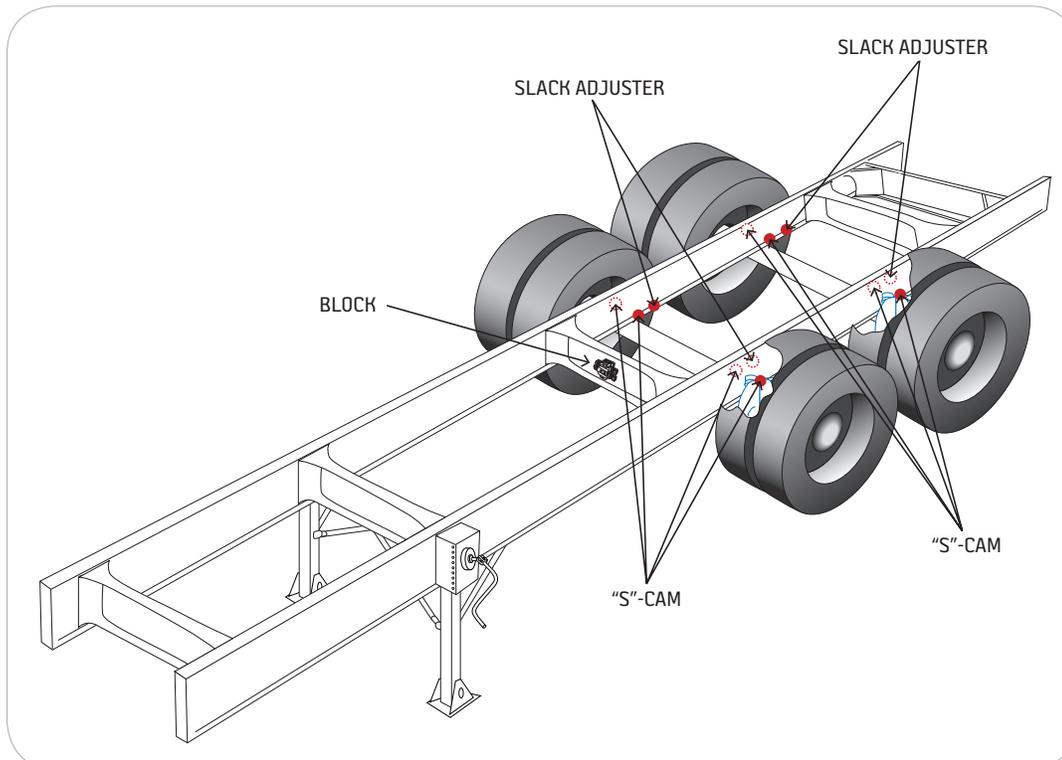

SureShot Kit

U-Block

Lubrication Points for Trailers

Included in a SureShot Kit:

- Divider block (4, 6, 8, 10 or 12 lubrication points)
- Pre-filled tubing
- Hardware for installation (elbow, straight, 45- and 60-degree adapters)
