

An IMCI Company

SUPPLY & INSTALLATION

Dependable service for years to come

OVERVIEW

All Bijur Delimon projects are available with total turnkey installation.

Pipework specification is supplied in a wide variety of materials including stainless and carbon steels, copper and ABS. We are able to take care of siting equipment, pipework, electrical installation and commissioning. Major installation contracts are carried out in all industries including steel works, power stations, cement works, paper mills, automotive plants etc.

We can also supply engineers to oversee systems installation and commissioning outside the United Kingdom, where local fitters are used.

Installations are carried out with the following capabilities:

- + Employer's Liability Insurance to £10m, Public and Product Liability to £5m
- + In house Safety Advisors qualified to NEBOSH and IOSH standards
- + Qualified Welders to ASME IX and BS EN287-1
- + ISO 9001 Accreditation

- + Client Contractors National Safety Group - CCNSG
- + MEWP operator trained
- + PASMA trained for mobile scaffolding
- + Asbestos removal & risk assessment for CAF gaskets
- + Confined space trained
- + Safe Contractor Accreditation
- + Pacific Industrial Contractor Screening - PICS
- + Achilles Accreditation.
