

# 55105 Lube Point Monitor

## Oval Gear Mechanism

### General

The 55105 Lube Point Monitor is an accurate oval gear mechanism that incorporates two magnets into one of the nylon oval gears. The body incorporates a reed switch which senses the magnet passing. Lubricant entering the 55105 causes the gears to rotate. Each pulse equates to an approximate displacement of 0.040 cu. in. (.65cc). The monitoring of the 55105 is done with any PLC. The feedback from the 55105 will assure that lubricant has reached the inlet of critical lubrication points.

### Application

The 55105 Lube Point Monitor is intended to be mounted at or near the lubrication point inlet. It can be used with any type of grease or oil system (Dualine/Progressive/PDI). Due to the nature of the internals, proper filtration is required to keep contaminants out of the monitor body. (i.e. inline grease strainer)

### Technical Data

Flow	0-2500cc/min.	
Maximum Pressure	10153 psi (700 bar)	
Accuracy	±3% (determined at +20°)	
Vibrations	20 g (10-20000 Hz)	
Life Time	10 <sup>9</sup> pulses	
Temperature	-4°F to 158°F (-20°C to 70°C)	
Connections	1/8NPT or 1/8BSP	
Material	Aluminum or Stainless	
Weight	0.186 kg	
Lubricant	ISO VG 32 Oil to NLGI Grade 2 Grease	
IP Enclosure Rating	IP-67	
Connection	4-pole M12 x 1 (male)	
Switch Rating	Maximum Voltage	0-24 VDC
	Maximum Current	0.20 amp*

### Wiring

PIN #	Description	Wire Color
1	Common	Brown
4	Signal	Black

Lube Point Monitor (Part #55105)

Lube Point Monitor shown with bearing. (Bearing not included)

#### \* CAUTION!

Destruction or damage of reed contact!  
Take notice of the max. contact loads!

The max. contact loads (switching voltage, switching current and switching capacity) refer to pure ohmic loads and may not be exceeded under any circumstances.  
High voltage and current peaks can occur, particularly when switching inductive or capacitive loads (e.g. relay coil, capacitors). Even if the overload is brief, this can destroy (welding the contacts) or damage (reduced lifespan) the reed contact.  
- Only use protection methods which be appropriate and checked.

Protection method when electrical connection of reed contacts:

The following protective circuits are basically possible:  
current limiting resistors, RC circuits, freewheeling diodes, suppression diodes, varistors or a combination of these.

## How to Order

Name		Material	Part #
Lube Point Monitor	1/8-NPT	Anodized Aluminum	55105
	1/8-BSPP	Anodized Aluminum	55105-B
	1/8-NPT	Stainless Steel 316	55105-SS

When ordering, specify by name and part number, e.g. Lube Point Monitor, Part #55105.

## Accessories

Description		Part #
Rebuild Kit		55381
Cable	Straight, 10 meters long	76928-2863
	90°, 10 meters long	76928-2833

*Note: Cables supplied separately.*

Note:  
Rebuild kit **55381** includes the following:

- + 2pcs Gear Wheels
- + 2pcs Magnets
- + 1pc O-ring
- + 4pcs Cover Screws
