

Drive Belt Bearing Lubrication in Coal Mines

FEATURES & BENEFITS

- Lower operating and maintenance costs
- Greater dependability and reduced wear
- Reduced risk of lubrication-related breakdowns
- Extended service intervals
- Skid can be easily relocated

Adding a Farval® lubrication system increases equipment life by decreasing wear on vital components. Automatic lubrication systems safely and continuously supply lubricant while your equipment is running.

PROVEN QUALITY, RELIABILITY & ACCURACY.

ZP6000 PUMP

The ZP6000 pumps are used for direct lubrication in multi-line systems with one delivery element per lubricating point.

- + Able to lubricate up to 32 points with a single pump.
- + Reservoir capacity up to 60 liters.
- + Adjustable rate of delivery.

ZP6000 Pump

SMAC CONTROLLER

The SMAC Controller is a multi-purpose programmable controller used with industrial lubrication systems. Controller settings are saved whenever power is interrupted. Up to four operating modes can be selected, which allows the controller to be used with various lubrication system designs. The controller is available in both 110 and 220/230 VAC service.

- + Digital status display on front cover for easy programming
- + System monitoring capabilities
- + Data memory function initiated at power down
- + Compact design
